Kicukiro, Kigali, Rwanda

PROFESSIONAL SUMMARY

Recent Software Engineering graduate from INES–Ruhengeri (B+, 2026) with practical internship experience in backend and full-stack web development at MasteryHub of Rwanda. Contributed to two real-world products — an e-commerce platform and a housing web application — gaining hands-on exposure to REST API development, database integration, and collaborative software delivery. Also a professional graphic designer proficient in Adobe Illustrator and Adobe Photoshop, with the ability to create engaging visual designs and graphic content. Passionate about building reliable, user-focused applications across web, mobile, and AI-powered domains. Eager to contribute to a software development team, continue learning, and grow into a well-rounded engineer.

TECHNICAL SKILLS

Languages:	Python, JavaScript, SQL, PHP, Dart	**Frontend:**	React, HTML/CSS, Tailwind CSS, Responsive Design
Backend:	Python/Flask, REST API Development, Auth Concepts	**Mobile:**	Flutter, Dart
Databases:	PostgreSQL, SQLite, NeonDB, Relational DB Design	**Tools & Practices:**	Git, GitHub, VS Code, API Testing, Agile Concepts
Design Tools:	Adobe Illustrator, Adobe Photoshop, Graphic Design		

PROFESSIONAL EXPERIENCE

Backend Developer & Full-Stack Development Intern

March 2026 – June 2026 | Rwanda

MasteryHub of Rwanda

- Contributed to the backend development of **Bobo eCommerce**, a web platform for online sales of electronic devices, implementing REST API endpoints and integrating a PostgreSQL (NeonDB) database.
- Participated in the development of **HomeNow**, a web application addressing housing and local community needs in Rwanda, working on both backend and full-stack feature implementation.
- Developed and integrated application features, ensuring reliable communication between frontend and backend components across multiple projects.
- Collaborated with team members in a structured development environment, participating in feature planning and code reviews.
- Applied REST API design principles, user authentication concepts, and relational database management practices in a real-world team setting.

Technologies: React, Python, PostgreSQL, NeonDB, REST API, JavaScript, Git

Hardware Store Assistant

October 2022 – June 2023 | Kigali, Rwanda

Hardware Store — Gacuriro–Gisozi, Kigali

- Assisted with day-to-day store operations including stock monitoring, inventory record-keeping, and customer service.
- Demonstrated reliability, strong organizational skills, and the ability to manage responsibilities independently.
- Developed communication and teamwork skills in a fast-paced customer-facing environment.

SOFTWARE PROJECTS

Final Year Project — github.com/nixky23

The Open Room — AI-Based Career Exploration Mobile App

- Designed and developed an AI-powered mobile application to help young people in Kigali, Rwanda explore career paths and make informed career decisions.
- Built core features including a personality and skills self-assessment module, personalized career recommendations, and curated learning resources.
- Integrated a Python/Flask backend to handle career-guidance logic and data management, with SQLite for local data storage.
- Implemented a structured career-path exploration interface and job-readiness support content within the Flutter frontend.

Technologies: Flutter, Dart, Python, Flask, SQLite, REST API | In Progress

Internship Project github.com/nixky23

Bobo eCommerce — E-Commerce Platform for Electronic Devices

- Contributed as a backend and full-stack developer to a web platform enabling customers to browse, search, and purchase electronic devices online.
- Implemented backend REST APIs for product management, user authentication, shopping cart, and checkout workflows.
- Integrated a PostgreSQL database hosted on NeonDB for product listings, user accounts, and order management.
- Supported frontend and backend integration to ensure consistent data flow across the application.

Technologies: React, JavaScript, Python, PostgreSQL, NeonDB, REST API | Completed

Internship Project github.com/nixky23

HomeNow — Housing Information Web Application

- Contributed to a web application focused on housing and local community needs in Rwanda, aimed at improving access to housing-related information.
- Worked on backend API development and full-stack feature implementation as part of the MasteryHub internship team.
- Implemented user authentication, search and filter functionality, and database integration for housing content.

Technologies: React, JavaScript, PostgreSQL, REST API | In Progress

Personal Project github.com/nixky23

Catering Equipment Inventory & Tracking Management System

- Designed and developed a business management system to help a catering company record, monitor, and track equipment entering and leaving storage.
- Implemented equipment registration, event-based issue-and-return workflows, missing/broken item reporting, and inventory status reports.
- Built user role management (storekeeper, admin) with accountability-focused workflows to reduce equipment losses.
- Delivered a practical, non-technical-user-friendly interface with clear feedback for each operation.

Technologies: Python, Flask, SQLite, HTML, CSS, JavaScript | Completed

EDUCATION

Bachelor's Degree in Software Engineering

Graduated: 2026

INES–Ruhengeri · Musanze, Rwanda

Result: B+

High School Certificate — Software Development

Completed: 2022

Lycée de Kicukiro APADE · Kicukiro, Kigali

Final-Year Aggregate: 32

LANGUAGES

Kinyarwanda — Native **English** — Fluent **French** — Basic
